EDUCATION

•Bachelor of Technology in Information Technology

R.M.K Engineering College, Thiruvallur, India.

Oct 2022 - June 2026

CGPA: 7.97

•Higher Secondary (Bio - Maths)

Sishya Matric .Hr .Sec School, Thiruvannamalai, India.

June 2020 - May 2021

Percentage: 82.6

EXPERIENCE

•Renu Sharma Healthcare and Educational Foundation

Web Developer Internship

Aug 2024 - Nov 2024

Haryana, India

- Collaborated on the NGO website, reaching 10,000+ users with a responsive, intuitive design, boosting outreach by 70% after optimizing and resolving technical glitches across multiple iterations.

•Oasis Infobyte

Java Development Internship

March 2023 - April 2023

Online

- Programmed two Java projects in 4 weeks: an ATM simulation improving transaction efficiency by 50% and a number guessing game with 90% prediction accuracy.

PROJECTS AND FREELANCE

•TyreWhizz - Smart IoT Based Tyre Monitoring System | React Native, Node.js, MySQL, IoT Integration

- Designed and deployed an IoT-enabled tyre monitoring system, reducing tyre-related accidents by 75%.
- Enhanced emergency response efficiency by 70% with a real-time mechanic locator feature.
- Developed a role-based management module, improving fleet efficiency by 75% and enabling data-driven decisions through a trained machine learning model.

•Retro-CoffeeShop | React.js, MySQL, CSS, JavaScript, Tailwind CSS

- Engineered a RetroCoffeeShop web app, enhancing engagement by 60% with features like fast order placement, reviews, and payment integration for 100+ users.
- Achieved 80% code efficiency by implementing React utilities and modular components.

•Profuel – Promotional Website for Fitness Brand | Freelance Project | HTML5, CSS3, JavaScript

- Designed and delivered a custom storefront website for a client launching their protein supplement brand, resulting in a 45% increase in online visibility and 30% faster product discovery by users.
- Improved mobile responsiveness and UX, leading to a 40% increase in accessibility and 30% higher engagement based on client feedback.

•ATM Machine Model | Basic Concepts of Java

- Built an ATM machine simulation application in Java, featuring secure PIN authentication, balance management, and transaction functionalities, improving technical proficiency by 30%.

TECHNICAL SKILLS AND SOFT SKILLS

Libraries/Frameworks: React.js, React Native,Tailwind CSS

Languages: HTML5,CSS3,JavaScript JAVA

Web Dev Tools: Node.js, VSCode, Git, GitHub, Figma, Canvas, Netlify, Firebase.

Cloud/Databases: Firebase, MySQL, Google Cloud ,AWS

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Software Engineering, Artificial Intelligence and Machine Learning, Cloud Computing, REST API, Agile Methodologies.

Soft Skills: Articulation, Systematic, Supervision, Ingenuity, Demonstrative Communication, Coordination

HACKATHONS AND STARTUP

•KPIT Sparkle | Finalist

Jan 2025

- Introduced a Tyre Monitoring app, integrating IoT hardware and software to monitor real-time tyre performance, reducing maintenance costs by 10%, improving uptime by 12%, and increasing fleet management efficiency.
- Founded a startup based on this innovation to bring advanced tyre monitoring solutions to the market.

•Smart India Hackathon | Shortlisted

Sep 2023

- **Software:** Created a digital assistant for legal awareness, achieving 80% user accessibility.
- **Hardware:** Assisted in creating an AAC system, enhancing communication for 20% of individuals with disabilities.

CERTIFICATIONS

•Big Data Computing | NPTEL Swayam

Aug 2024 - Oct 2024

•REST Application Development Using Spring Boot and JPA | iamneo

Dec 2024

•Managing Cloud and Containerisation | iamneo

Dec 2024

•Frontend Developer (React)Certificate | HACKERRANK

June 2024
